## About

Aspiring Data Analyst with hands-on experience in Power BI, SQL, Python, Machine Learning and Data Visualization. Skilled in transforming raw data into actionable insights through dashboards, statistical analysis, predictive modeling and business intelligence solutions. Passionate about solving business problems using data-driven decision-making.

## Skills & abilities

- **Data Analytics & BI:** Power BI, Tableau, Microsoft Excel, Data Visualization, Dashboard Development, Business Intelligence.
- **Programming:** Python, SQL, Java (Basic).
- **Data Science & Machine Learning:** Pandas, Numpy, Scikit-Learn, Keras, Exploratory Data Analysis (EDA), Tensorflow, Data Cleaning, Predictive Analytics**.**
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab.
- **Database:** MySQL, PostgreSQL, MongoDB.

## Experience

**AI-ML Virtual Intern**

EduSkills | AICTE & National Internship Portal (*Jul 2025 – Sep 2025* ).

- Applied Machine Learning and Deep Learning concepts in real-world datasets.
- Developed AI-based solutions using Python, TensorFlow, and OpenCV.
- Performed data preprocessing, model training, and performance evaluation.
- Gained practical exposure to analytical workflows and predictive modeling.

## Projects

**1. IPL Performance Analysis Dashboard**

- **Tech Stack:** Power BI, Excel, Data Visualization.
- Developed an interactive Power BI dashboard to analyze IPL team and player performance.
- Created KPI-based visualizations for batting, bowling, strike rate, and win statistics.
- Delivered actionable insights through data storytelling and dashboard design.

**2. Retail Sales Analysis & Forecasting**

- **Tech Stack:** Python, Pandas, Power BI, Machine Learning.
- Analyzed retail sales datasets to identify trends and customer purchasing patterns.
- Performed data cleaning, feature engineering, and exploratory data analysis.
- Built forecasting models using machine learning algorithms.
- Generated business recommendations to improve sales performance.

**3. Real-Time Facial Emotion Detection System**

- **Tech Stack:** Python, TensorFlow, Keras, OpenCV, CNN.
- Developed a deep learning model to classify facial emotions in real time.
- Implemented Convolutional Neural Networks (CNNs) for image classification.
- Achieved accurate emotion recognition across multiple emotion categories.
- Integrated computer vision techniques with machine learning workflows.

## Education

Pursuing **Bachelor of Technology (CSE)** at Invertis University (2023 –27) with CGPA: **8.4/10.**
Completed **Higher Secondary(10$^{th}$)** in 2021 with a score of **80.6%** from New Era Academy.
Completed **Senior Secondary(12$^{th}$)** in 2023 with a score of **77.6%** from New Era Academy.

## Certifications

- **Data Analytics using Tableau** – Crio.Do
- **Data Science Boot Camp** – Geeks for Geeks
- **SQL and Relational Databases 101** – CognitiveClass.ai (IBM)
- **Power BI** – Ducat IT Training School
- **AI-ML Virtual Internship –** EduSkills (AICTE)
